

g64 / g68 seating

g64 - one of our most successful task chairs for over eight years, g64 has set new standards for this market sector. its precision engineering delivers a chair of proven longevity, with 98% of its parts recyclable. no two work places are the same and the g64 family can cater for everything from call centres to executive offices, depending on the product specification.

g68 - one chair, one design language, two back options. the lightness and transparency of mesh or the unique comfort of upholstery, offers everyone a choice of a support technology that works for them. like the human body the g68 is built on a peerless skeleton, where the engineering and design intelligence are directed to achieve an assembly of components, that work in unison to move, adapt and support - whatever the task and whomever the user
